IM SO CONFUSED I DON'T KNOW WHERE TO ACCSES IT I FEEL AS IF IVE BEEN SCAMED. Too short, but overall is good especially the audio.. Been waiting for this .. Go Cinninati Reds!. BMW and Genesis are nice alternatives to the vanilla counterparts, Cadillac is extremely fun but will get you last place unless you really know what you're doing, GT-R as useless as ever.

5.5V8.5 do it for the caddie. Trying to cut it short:

From a technical standpoint this game is a blast. Graphics, sounds, animations... the world... so many things are great. But the story is utter nonsense. The general idea is great, but I have no idea hwo the producers thought that it is a good idea to juust randomly takeyou out of control. Even at the very end (Spoiler alert): why on earth would the game not allow you to fight your way to Joseph and then decide about what to do? You reallly just get into an endless monologue once you approach the destination... seriously?

Far Cry 4 shows perfectly how it works... and here it is just plain stupid.

Short but very interesting game.. Honestly compared to the first 3 games, this one just felt kind of lacking, like the guy had some kind of deadline he had to meet and whatever he didn't finish he left for the next game.. Red Five will be proud. Recommended to buy if you looking for a good air combat/dog fight simulator. I enjoy it 10 years ago, I still enjoy it now. You think you got what it takes to beat Luke Skywalker high score? Then try this game.. Buggy piece of software with a very unintuitive user-interface with some super old documentation to boot.

One of the guides was three years old now with one of the comments from three months ago asking if a bug with the skins feature was being fixed. The dev said to look forward to Spriter Pro 2 and to not expect for a fix in this version (though it said it should be free if you own Spriter Pro). The skins were really the only reason I got this in the first place, yet it's an unfinished experimental feature. I haven't seen any info on Spriter 2 either.

Making prefabs of skinned sprites or in fact making prefabs in general seems to not exist in this at all as well. Performing simple actions like joining bones, copying bones, copying sprites, copying keyframes, selecting keyframes, managing sprite hierarchy, etc. are also very cumbersome to do. Working with the animation timeline especially is very tedious.

I really think it doesn't do anything well. I wish I had known to just get Spine instead.. Fast, fun, & highly addictive. Definitely worth picking up.. dads a god agme
